Portfolio: <https://portfolio.muppidirajeshbabu-23-csm.workers.dev>

PROFESSIONAL SUMMARY

Computer Science undergraduate specializing in Machine Learning with strong skills in Java, Python, Data Structures, and Software Development principles. Experienced in developing responsive web applications, REST APIs, and user-centric solutions through internships and projects. Strong understanding of Object-Oriented Programming, Database Management Systems, Operating Systems, and problem-solving techniques. Passionate about building scalable applications and solving real-world challenges.

EDUCATION

Bachelor of Technology – Computer Science and Machine Learning

Anil Neerukonda Institute of Technology and Sciences

Expected Graduation: 2027

Intermediate (Class XII)

SASI Intermediate College-90%

Secondary Education (Class X)

SASI English Medium High School-100%

TECHNICAL SKILLS

Programming Languages: Java, Python, JavaScript

Frontend Technologies: HTML5, CSS3, React.js, Tailwind CSS

Backend Technologies: Node.js, Express.js, REST APIs

Databases: MongoDB, MySQL

AI/ML Technologies: NumPy, Pandas, scikit-learn, Matplotlib

Core Computer Science: Data Structures and Algorithms (DSA), Object-Oriented Programming (OOP), Database Management Systems (DBMS), Operating Systems, Computer Networks

Tools & Platforms: VS Code, Git, GitHub, Figma, Linux, Jupyter Notebook, Postman

Deployment & Cloud: Cloudflare Pages, Vercel, Netlify

EXPERIENCE

Full Stack Web Development Intern — Future Interns

July 2025 – August 2025

- Developed responsive web interfaces using HTML, CSS, and JavaScript.
- Built and tested REST APIs for efficient frontend-backend communication.
- Assisted with database integration and debugging activities.
- Collaborated with team members to improve application performance and functionality.
- Followed software development best practices and version control workflows.

Front End Web Development Virtual Intern — IBM SkillsBuild

- Duration: 6 Weeks
- Completed project-based training in frontend web development.
- Built responsive web interfaces using modern web technologies.
- Participated in technical sessions and mentor-guided learning activities.
- Delivered solutions addressing real-world use cases.

PROJECTS

Flood Detection System using IoT Sensors

- Designed and developed an IoT-based flood monitoring system using Arduino and environmental sensors for real-time water level tracking.
- Integrated real-time sensor data into a web-based monitoring dashboard to display live environmental readings.
- Developed a responsive frontend interface using HTML, CSS, and JavaScript for data visualization and alert notifications.
- Improved real-time monitoring and alert mechanisms to improve disaster detection and response efficiency.
- **Technologies Used:** Arduino, IoT Sensors, JavaScript, HTML5, CSS3

AI-Powered Movie Recommendation System

- Developed a content-based movie recommendation system using Python, Scikit-learn, CountVectorizer, and Cosine Similarity to generate personalized movie suggestions.
 - Processed and cleaned a dataset of 500+ movies with feature engineering and text preprocessing techniques.
 - Applied CountVectorizer and Cosine Similarity to extract text features and generate similarity-based recommendations.
 - Built an interactive Streamlit web application for real-time movie search and recommendations.
 - Generated personalized top-movie recommendations through content similarity analysis
 - **Technologies Used:** Python, Pandas, NumPy, Scikit-learn, Streamlit, CountVectorizer
-

CERTIFICATIONS

- Java Certification — PW Skills
 - Web Development Fundamentals — IBM
 - AI Internship Certificate — CodeTech
-

ADDITIONAL STRENGTHS

- Strong analytical and problem-solving abilities
- Team collaboration and communication
- Quick learner with adaptability to new technologies
- Passion for software development and continuous learning
